

Aegis Electronic Group adds Basler Vision Machine Vision Cameras to Portfolio

Aegis and Basler join forces to offer end users more high quality industrial camera options

March 1, 2010, Gilbert, Arizona – Aegis Electronic Group, Inc., a top industrial camera distributor specializing in the distribution, integration and support of visible and Near IR cameras, components and modified integrated system solutions, has announced a new strategic partnership with one of the world’s leading industrial camera manufacturers, Basler Vision Technologies.

Under their agreement, Aegis will be a distributor for Basler’s line of high performance, digital Firewire, Gigabit Ethernet (GigE) and Camera Link™ line scan and area scan machine vision cameras. For nearly twenty years, Basler’s digital cameras have been characterized by high quality, reliability, easy integration, and ease of use. They have proven to offer reliable, price-for-performance products created by professionals devoted to developing and producing high technology products for an industrial environment.

“Basler’s reputation speaks volumes about what their cameras have to offer. The addition of the Basler line of machine vision cameras to our portfolio is another piece of the puzzle in our continuous efforts to increase the number of quality industrial imaging systems available to our customers”, says Nicole Zamora, Business Development Manager for Aegis Electronic Group. In an always evolving industrial environment, being able to give our customers more options to choose from when looking to fulfill their imaging requirements is key because of the complexity of each individual application. We pride ourselves in being a stocking distributor for a wide variety of the best imaging systems available from the top camera manufacturers in the industry and it is for that reason that this new partnership will be a good fit for everyone involved.”

Aegis is now offering over 100 different cameras models from the following Basler camera lines; Basler Scout, Basler Scout Light, Basler Pilot, Basler Ace, Basler Area Scan, Basler Line Scan and Basler Sprint series.

More product information on the Basler line of Machine Vision cameras can be found at http://www.aegis-elec.com/products/basler_cameras.html

About Basler Vision Components

Basler Vision Technologies offers components, such as cameras, and inspection systems for quality control, measurement, identification or surveillance which are a substantial element for the optimization of industrial production processes and the maximization of profits. The cameras are characterized by an excellent image quality, easy integration and a compact housing size.

About Aegis Electronic Group

[Aegis Electronic Group, Inc.](http://www.aegis-elec.com), specializes in the distribution, integration and support of visible and Near IR cameras, components and modified integrated system solutions for industrial and machine vision imaging applications.

Committed to delivering value added solutions with the highest levels of technical support, customer service and quality hardware, Aegis, over the last 20 years, has transformed from a hardware provider into a full systems integrator of industrial analog and industrial digital camera systems.

Aegis works extensively with the latest digital technologies including FireWire®, Camera Link™, USB 2.0 and Gigabit Ethernet (GigE)® to meet the ever changing needs of our customers.
