

Your leading global industrial camera solutions company

Aegis Electronic Group, Inc. Brings Camera Technology to Meet the Demanding Applications of Drone Technology to AUVSI.

Aegis Electronic Group, Inc is proud to join forces with highest quality camera manufacturers bringing their specialities to designers of UAV, UGV, Unmanned Surface and Unmanned Underwater Vehicles. If you are looking for the latest information on Block Cameras, Infrared, Thermal Imaging and more read on...

May 09, 2014 - [Aegis Electronic Group, Inc](#) the leader in industrial camera technology for autonomous vehicles will be demonstrating camera technology with its various imaging partners (Block Cameras, Infrared Cameras and Thermal Imaging Cameras) at AUVSI's Unmanned Systems 2014 Conference on May 13th through 15th at the Orange County Convention Center in Orlando, Florida.

The newest and most technically advanced cameras will be a key highlight of the conference. Aegis is a pragmatic provider in imaging technology realizing that imaging technology is not a "one-size-fits-all" solution and matches designer needs with various solutions from "off-the-shelf" to custom builds unique to customer requirements.

Private "one-on-one" meetings will provide access to a comprehensive collection of cameras for UAV, UGV, as well as Unmanned Surface and Underwater Vehicles. These meetings will happen at various booths and locations throughout the show. Aegis prides itself on working in one-on-one environments to provide secure discussions with its current and future partners so they can leverage their specific technologies in confidence. Aegis's Vice President of Camera Technology, David Naranjo and Sales Engineer Tom Garcia will be there to discuss applications and the best camera solutions available by various camera suppliers. Be sure to pick up a USB Key with a vision selector that is up-to-date with the latest technologies from [Sony Block Cameras](#), [Lumenera infrared](#), [Sofradir thermal imaging](#), [Sentech America](#) custom cameras and more.

Aegis Electronic Group, Inc., is a woman owned, small business, ISO9001:2008 Certified Organization specializing in the distribution, integration and support of visible, IR, Near IR cameras and thermal imaging components and modified integrated system solutions for Industrial Broadcasting, Bioscience, Drones, Military (UAV, UGV), Medical, Microscopy, Remote Monitoring, Security/Surveillance, Space, Traffic, Video Conferencing and Machine Vision imaging applications.

Committed to delivering value added solutions with the highest levels of technical support, customer service and quality hardware, Aegis, over the last 20 years, has transformed from a hardware provider into a full systems integrator of industrial analog and industrial digital camera systems.

Aegis works extensively with not only analog but with the latest digital technologies including FireWire®, CameraLink, USB 3.0, Gigabit Ethernet (GigE)® to meet the ever changing needs of our customers.

For more information on setting up your "one-on-one" camera demonstrations at AUVSI's Unmanned Systems 2014 visit <http://www.aegis-elec.com> or call David Naranjo at 760- 522-2441 or Tom Garcia at 623-206-6933.
