

***Toshiba Teli to Introduce Two New
High Definition, High Sensitivity Color Cameras with DVI Interface***

January 4, 2010– Irvine, CA Toshiba Teli Corporation announced the upcoming release of two new "state of the art" single body high definition cameras with DVI Interface, the HD (720p) CSDS60CM3 and the Full HD (1080p) CSDW60CM28.

The [CSDS60CM3](#) integrates a 1/3" CMOS color sensor to achieve 1280 x 1024 or 1280 x 720 at 60 fps and the [CSDW60CM28](#) integrates a 1/2.8 CMOS color sensor to achieve SXGA (1920 x 1080) at 60 fps.

Optimized for today's challenging machine vision, microscopy, endoscopy, aerospace, and R & D applications, both cameras offer the absolute sharpest, most clearly defined images with the truest possible colors.

High Sensitivity

The CSDS60CM3 and CSDW60CM28 employ backside illumination (BSI) technology to boost light sensitivity and absorption, allowing for the formation of finer image pixels.

DVI Interface:

Simple to use, ultra fast DVI interface assures highest levels of reliability, compatibility and image quality. Syncs with new Toshiba Teli CM1500 SD card recorder and all DVI input monitors. Frame rate for DVI is twice as fast as Camera Link ®, four times as fast as Gigabit Ethernet and eight times as fast as FireWire (S800) or USB 2.0.

Feature Rich Design:

Cameras offer progressive scan, rolling electronic shutter, line generator (2 lines), special control software and other advantages for the best possible imaging performance.

The CSDW60CM28 and CSDS60CM3 are anticipated to be available in June 2010. For additional information, please call 1-888-687-6877.

About Toshiba Teli Corporation

Toshiba Teli America, Inc. is the North American subsidiary of Toshiba Teli Corporation, a world-leading manufacturer of CCD and CMOS cameras. Toshiba Teli Corporation has 400 employees and has a primary operation in Hino-City, Tokyo, and sales offices in Tokyo, Kobe, Nagoya and Fukuoka. In addition to cameras, Toshiba Teli Corporation manufactures a wide range of equipment, including surveillance camera systems including DVR recorders, LCD inspection equipment, multi-value image measurement and manufacturing equipment, and RF amplifiers.
